Clinic or Office Care

Use clinic care to treat an illness or injury that is NOT life threatening and doesn't appear to pose a serious health risk, such as:

- Allergies
- Asthma (minor), Bronchitis, Cough
- Pregnancy testing
- Burns (minor)
- Colds, flu, fever, sore throat
- Dehydration (mild)
- Dizziness
- Ear infection, pink eye
- Dental concerns
- Insect bites
- Headaches
- Small burns, cuts, lacerations, rash
- Minor head injury
- Nausea
- Sprains, strains, possible fractures
- Urine Infections
- Minor Work Injuries
- Medication Refills, Work Release

Call your physician clinic to make an appointment. If you do not have a family physician see below for clinics available in Charles City.

 Dr. David Schrodt
 Dr. Janet Tull
 Jodi Heyer PA-C

Dr. David Schweizer
 Dr. Joseph Molnar
 Steve Blum PA-C,FNP
 Joanne Starr ARNP

Emergency Care

Seek emergency care by calling 911 or presenting to the Emergency Department when SERIOUS or LIFE THREATENING illness/injury is suspected such as:

- Chest pain, Rapid heart rate
- Fractures w/bone visible
- Confusion
- Fainting
- Fevers in infants less than 2 months old
- High fever
- Ingestion of obstructive objects
- Ingestion of poisons
- Major head injury
- Pneumonia
- Seizures
- Severe abdominal pain
- Shortness of breath (severe)
- Burns (severe)
- Headache (severe)
- Trauma or injuries (severe)
- Unconscious
- Uncontrollable bleeding

Many emergency department visits are unnecessary or could have been avoided.

Emergency Rooms have higher copays and longer wait times.

Most insurance companies are denying payment for emergency department visits because it is considered a "non-emergency". The patient will then be billed for the care they received in the emergency department.
